

Circular Tower

Floorplan Layout

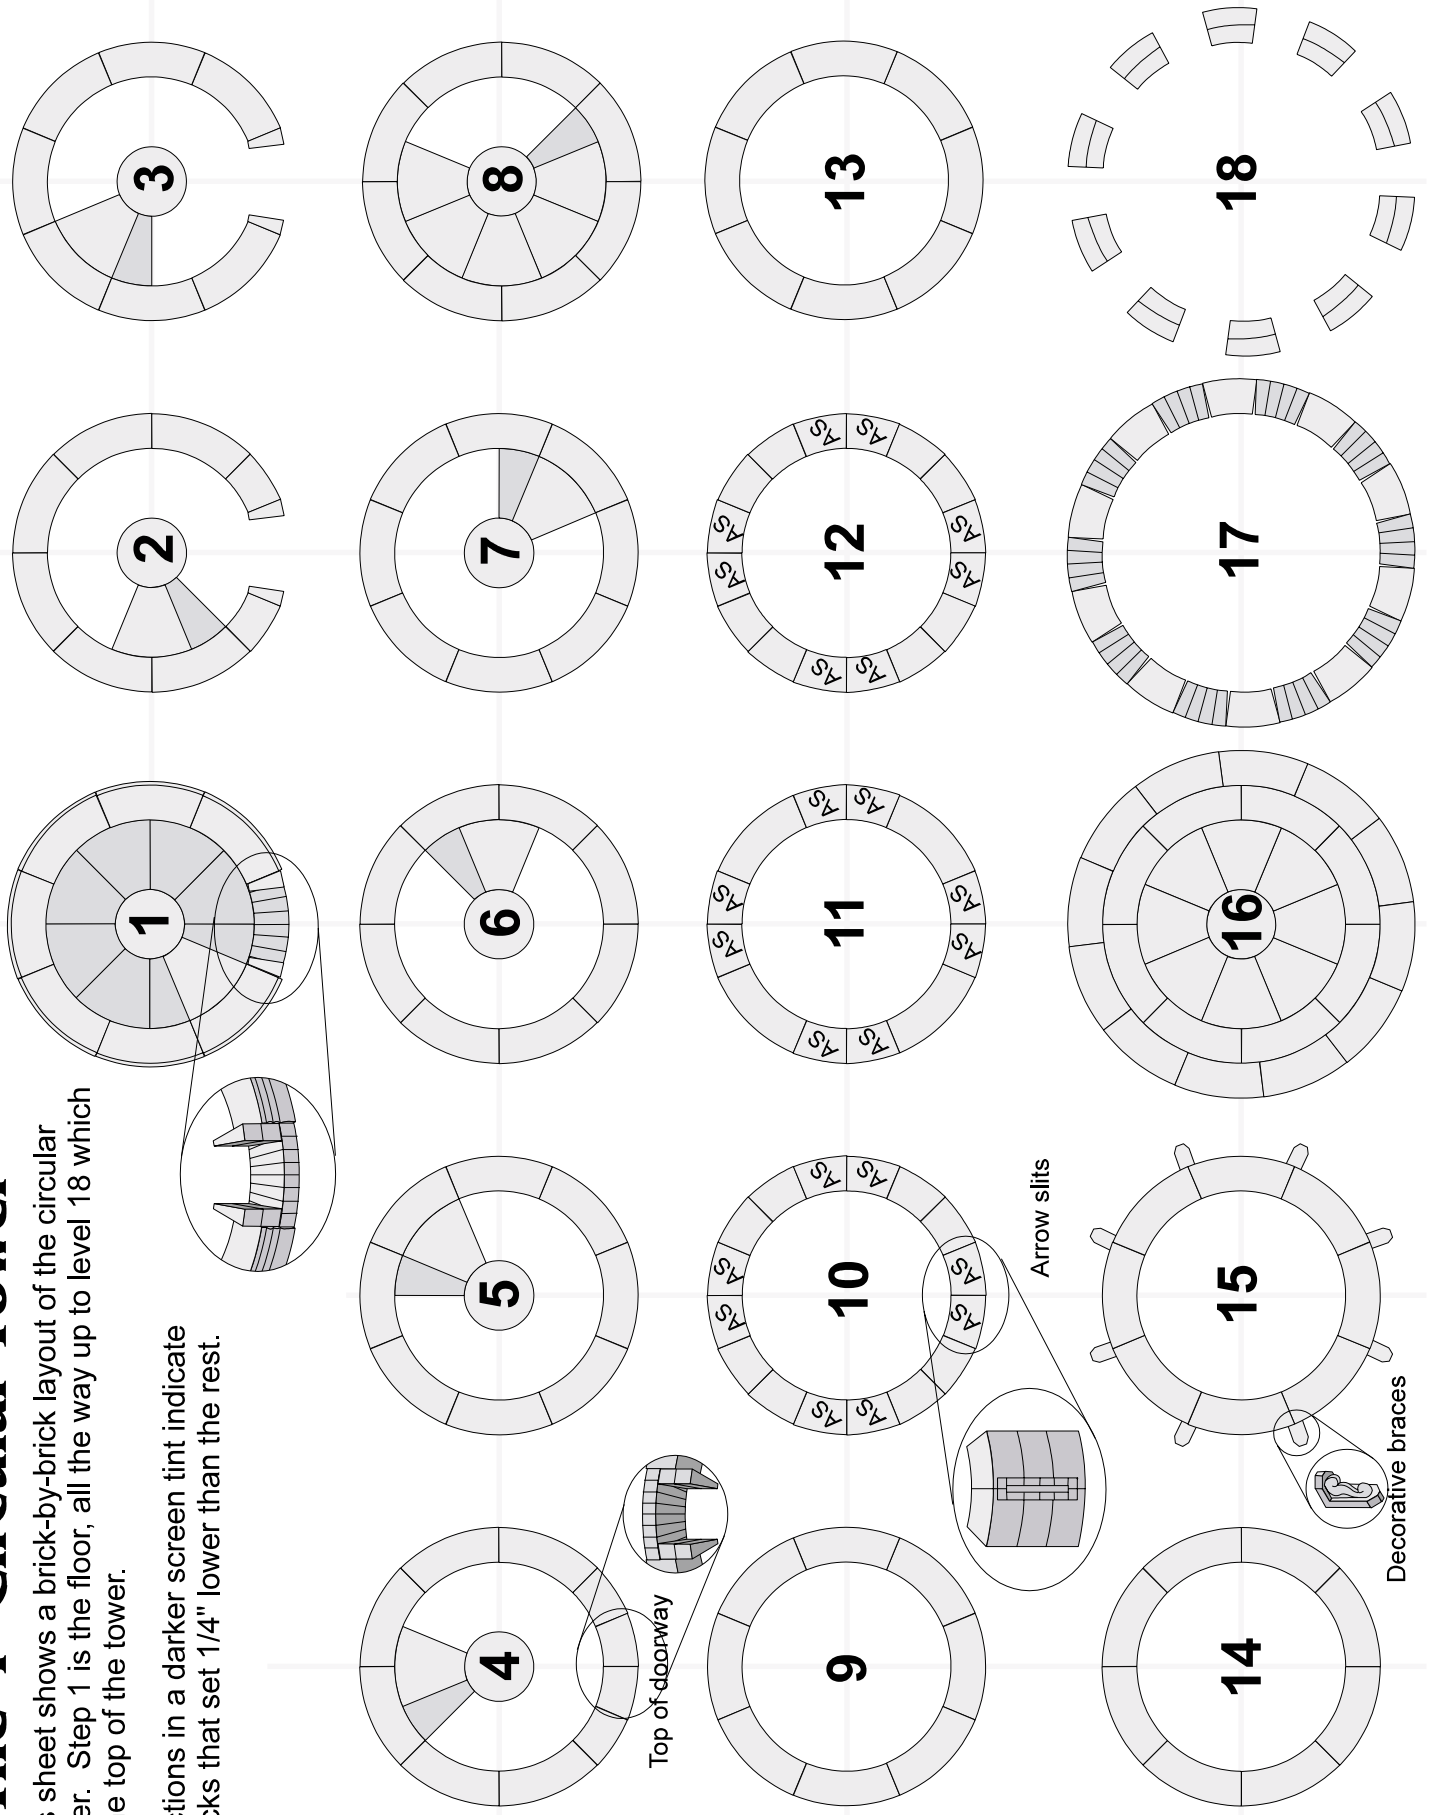

If you intend to take this model apart in sections, be sure that you mark where "not to glue" using a magic marker on the blocks. These marks will serve as a reminder for you later on (it's real easy to forget and end up gluing the whole thing together).

The 4" Circular Tower

This sheet shows a brick-by-brick layout of the circular tower. Step 1 is the floor, all the way up to level 18 which is the top of the tower.

Sections in a darker screen tint indicate blocks that set 1/4" lower than the rest.

Top of doorway

Arrow slits

Decorative braces
