

Rubble Bridge

To build the bridge, you will need
eight castings of mold #259
and four castings of mold #224

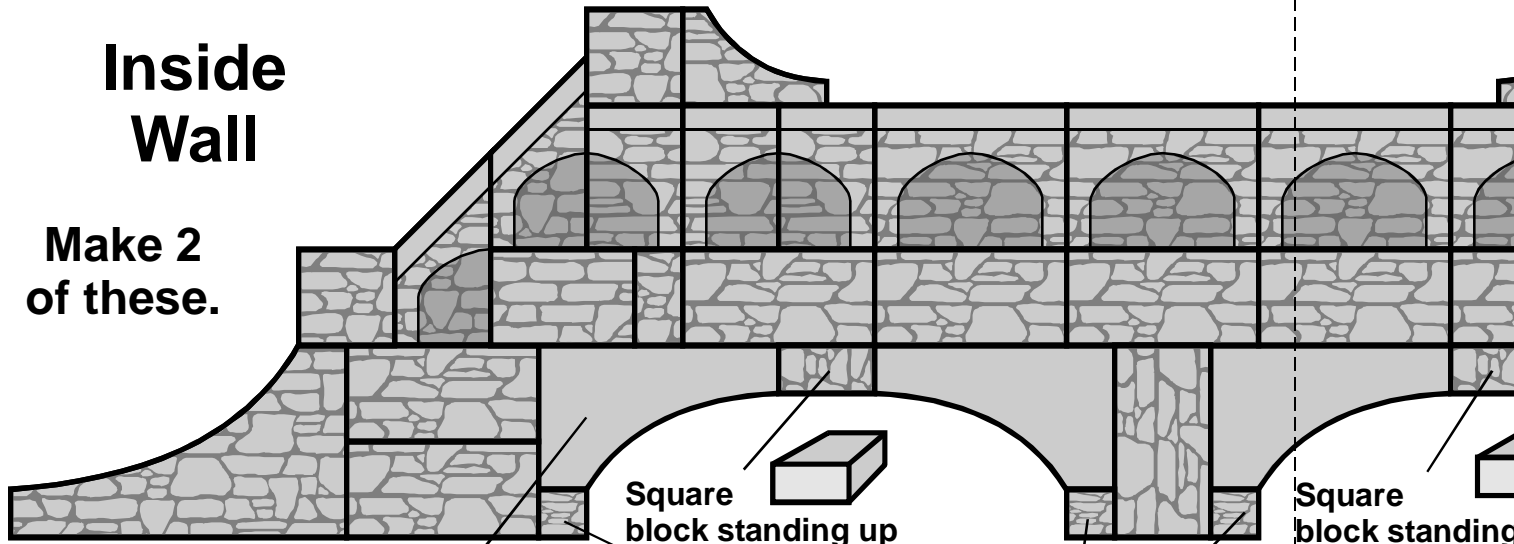

Outside Wall

Make 2
of these.

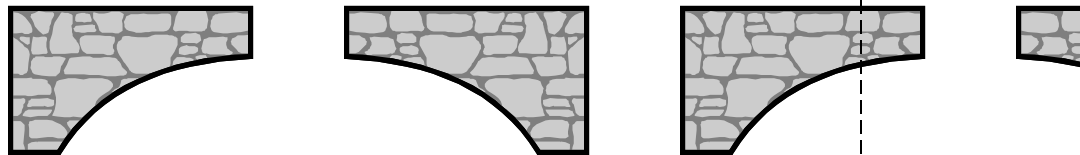

Inside Wall

Make 2
of these.

Turn these arches over so the texture
is on the back side.

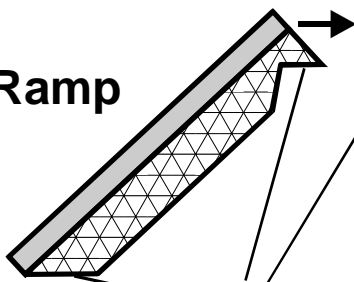

Tiny bricks on edge

Paint the wooden deck,
ramps and bridge sides
separately before
assembling the bridge.

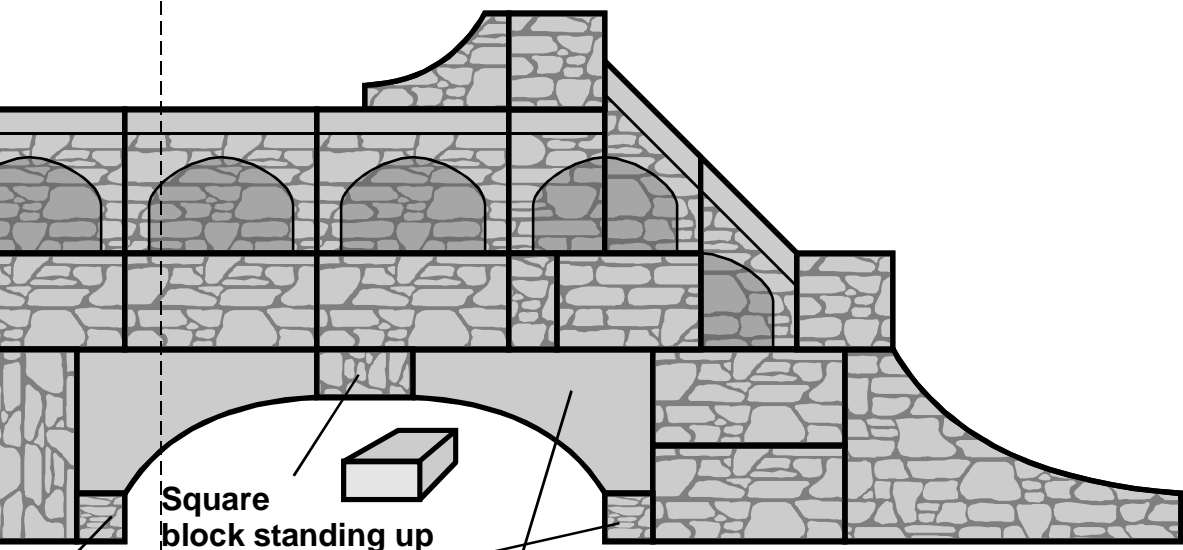

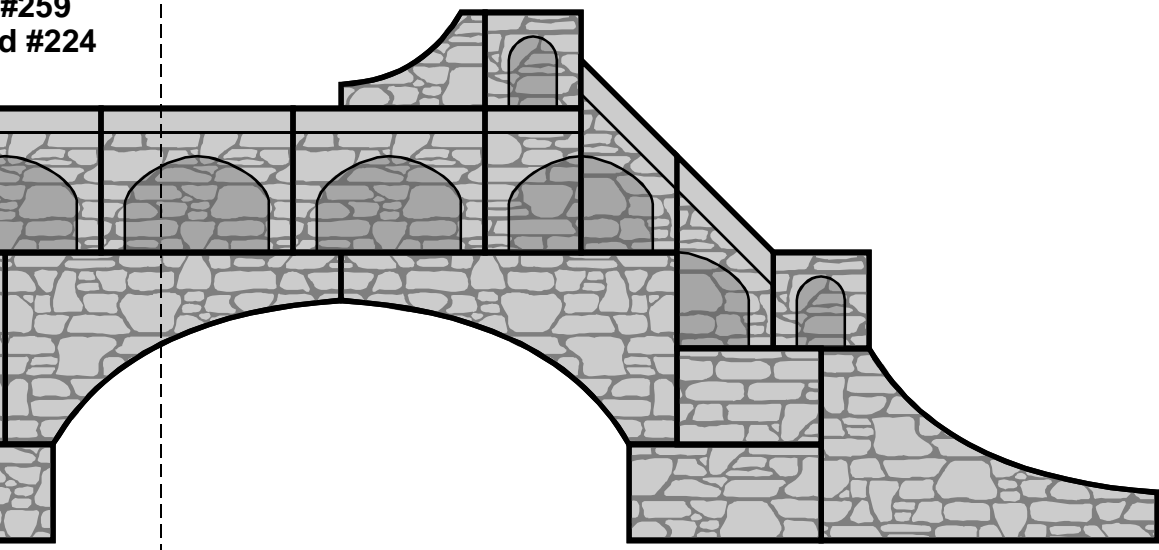

Center bridge deck

Ramp

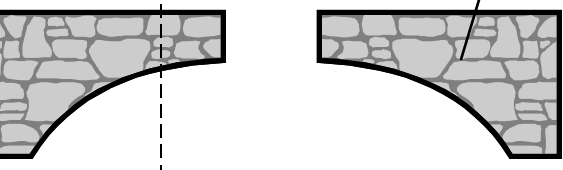

Trim the cardboard under the deck planks so the floor of the bridge will angle a

will need
#259
d #224

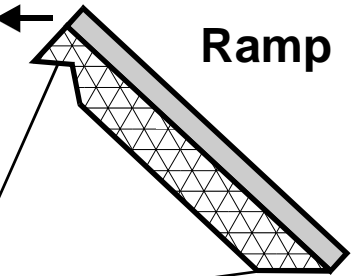

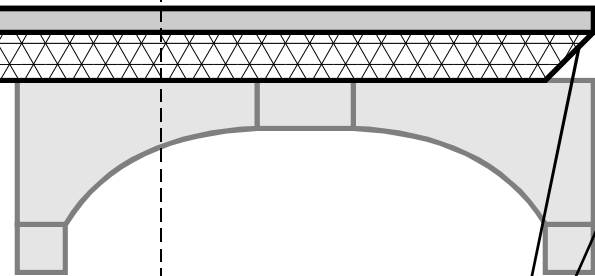

Square
block standing up

edge

Glue these arches on top of the
"wrong facing" arches above.
This will give the deck and ramps
of the bridge something to rest on.

deck

Ramp

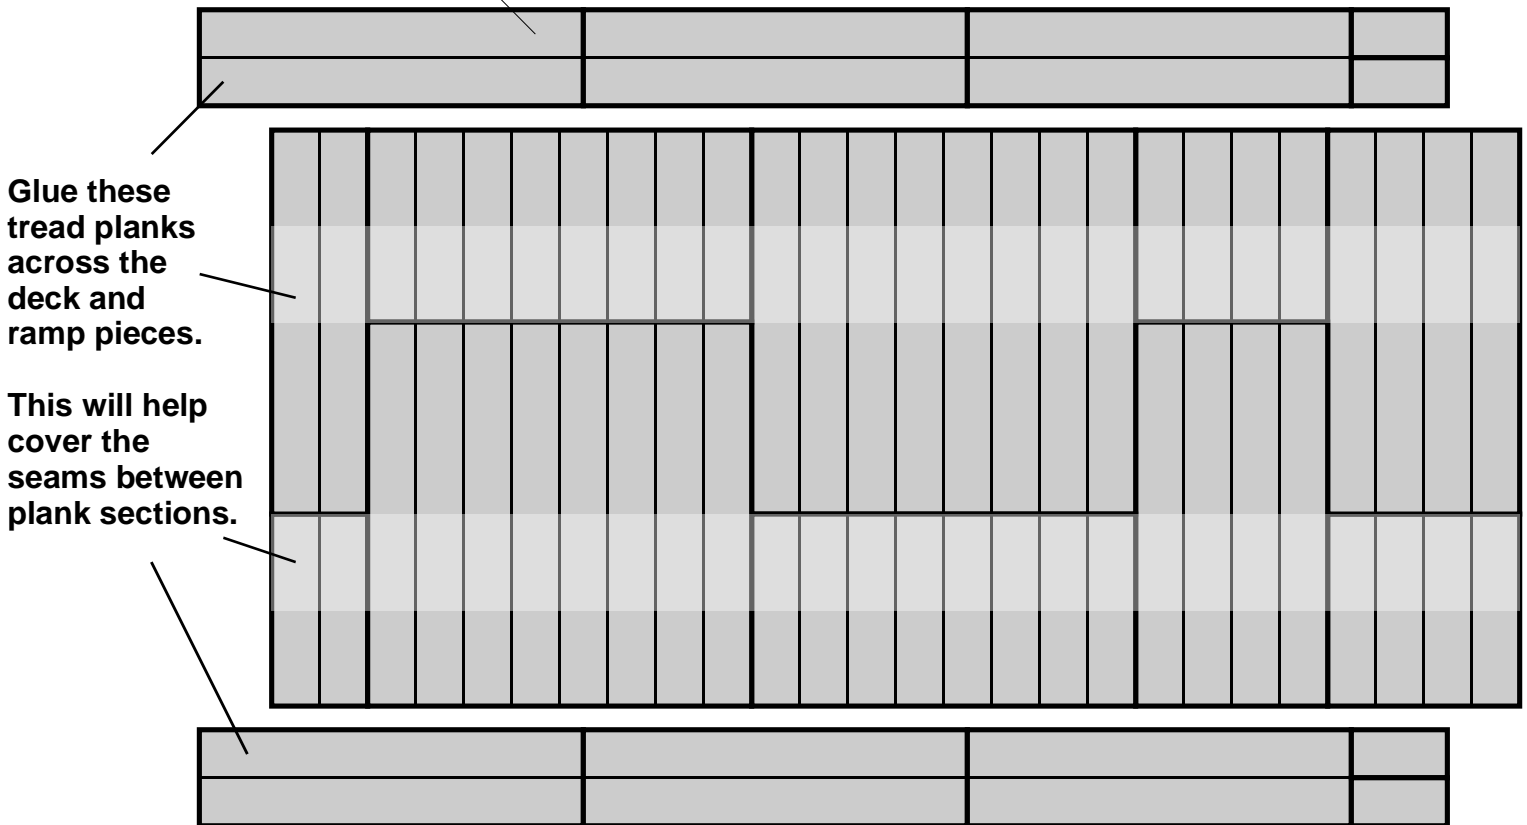

of the bridge will angle and set correctly.

Rubble Bridge

Center Bridge Deck

Glue these deck and ramp pieces onto cardboard.

In order to have enough of these 2-plank pieces, you will need to break several 4-plank pieces in half.

Glue these tread planks across the deck and ramp pieces.

This will help cover the seams between plank sections.

Left and Right Bridge Ramps
